

Copenhagen Suborbitals

Press & Media Disclaimer

Date: April 2010

Please read, understand and accept the following if you want to create press related material (print, web, TV, film and all other possible media types) about Copenhagen Suborbitals.

Before you meet us or begin your work, we would like for you to:

- Perform a background research on Copenhagen Suborbitals, the project and goals,
- Perform a background research on Peter Madsen and Kristian von Bengtson,

We would like you to respect and understand the following:

- Any story must have an equal representation of both Copenhagen Suborbitals partners: Kristian von Bengtson and Peter Madsen,
- Both partners Kristian von Bengtson and Peter Madsen are equal founders and full time workers on the project,
- Take our project seriously,
- Copenhagen Suborbitals must obtain the story/material for read through, corrections and approval, at least 24 hours before the deadline or whenever it fits your deadline,
- Provide Copenhagen Suborbitals with a copy of the final material, if printed/published,

Quick info:

Copenhagen Suborbitals was founded in 2008 by Kristian von Bengtson and Peter Madsen, who both work fulltime on a mission to build their own launching vehicle and spacecraft, in order to launch them selves and other Copenhagen Suborbitals members into space. In August 2010, the rocket HEAT-1X-P, with a dummy-manned spacecraft will be launched in the Baltic Sea. The project is non-profit and sponsored by a large number of Danish companies, and has a group of 15 dedicated people, working on the project in their spare time.
